

PNEUMATIC LIQUID PUMP SERIE

气动药液泵系列

气动药液配比泵整体采用特殊不锈钢管件，结合物理学活塞虹吸原理，并独创加入气动元素，以气作为动力启动源，而设计的一款新型药液配比设备。

其主要特点动力强劲，出水口压力大，稳定性好，一台设备可同时满足多个工作点的同时操作需要，具有较高使用价值。

"Haibao" brand pneumatic medicine liquid ratio pump overall use of special Stainless steel pipe fitting, combined with physics piston siphon principle, and original creation Add pneumatic elements to the air as a power source, and designed A new type of pharmaceutical liquid mixing equipment. Its main characteristics of strong power, outlet pressure, stability Good performance, a device can meet multiple working points at the same time Operation needs, has the high use value.

PNEUMATIC PROPORTIONING PUMP
气动配比泵

压力：0.5-0.7MPa
Pressure

配置比例：0-5%
Configuration ratio

输出压力 (MAX)：0.9MPa
Output pressure

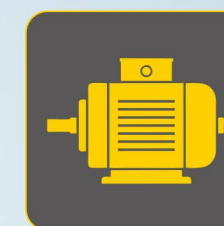

输出流量 (MAX)：14L/min
Output flow

配比准确
